

# HCFC Phase Out

Let us take the pressure

## Cash for Gas

### Large credits available for recovered R22\*

With the expected shortage of reclaimed R22 to service the market in 2010 we need as much as possible **NOW**. We will give you at least **£1.25/kg** credit for reclaimable R22 returned to us.

**DO - only put R22 into the recovery cylinder** (if another refrigerant is mixed with the R22 it will incur an incineration charge).

**DO - fill the cylinder with as much as safely possible.** Maximum of 53kg in a large recovery cylinder (please don't overfill the cylinder as this makes it potentially dangerous).

**DO - get the credit.** Minimum quantity required to qualify is 40kg of refrigerant in a single cylinder. Contact us for details.

\*Credits for recovered R134a also available
