

# Influenza A Pandemic Alert; Protecting against infection.

## What measures can you take to protect against infection?

General infection control practices and good respiratory hand hygiene can help to reduce transmission of all viruses including the human swine influenza. This includes:

- Covering your nose and mouth when coughing or sneezing, using a tissue when possible
- Disposing of dirty tissues promptly and carefully
- Maintaining good basic hygiene, for example washing hands frequently with soap and water to reduce the spread of the virus from your hands to face or to other people
- Cleaning hard surfaces (e.g. door handles) frequently using a normal cleaning product
- Making sure your children follow this advice\*

BOC offers a range of products that when used correctly may assist in reducing exposure to the virus however please note; use of such products does not guarantee the user will not contract the virus.

### Respiratory Protection

3M 9332 Valved  
FFP3 Respirator

52297  
• Box of 10

£45.08
