

Connecting Regulators & Cylinder Set-up Practical

If you can't identify the hazards you can't assess the risks

This 1½ hour Instructor-led workshop provides practical instruction on the correct assembly of individual gas cylinders

Benefits

- Training delivered by highly skilled, industry trained, experienced course directors
- Staff are made aware of the hazards so they can identify risks and adopt safe working practices
- Staff will appreciate the need to treat all gas control equipment with respect

Who should attend?

- Anyone who connects regulators to gas cylinders
- Managers with operational responsibilities for safety
- Managers, supervisors and staff from all functions who are responsible for the safe use of gases
- Risk managers and anyone responsible for health and safety

"I have received nothing but positive comments from the delegates and their Team Leaders...they now have the confidence to be more pro-active in assessing the risks involved with using gas cylinders "

Nigel Dix, Safety, Health and Environmental Coordinator
The Forensic Science Service

Workshop overview

- The need for personal protective equipment
- Single and multi-stage regulators
- Pre-use visual checks on regulators
- Correct fitting of gas regulators
- Visual checks on hose assemblies
- Correct attachment of hose assemblies
- Setting correct working pressures
- Leak test procedures
- Safe working practices with gas regulators
- Practical workshop session

What you will learn

The workshop will enable participants to:

- Correctly identify gas cylinders
- Recognise how cylinders operate
- Identify potential hazards on gas regulators
- Select the correct gas control equipment
- Correctly fit a gas regulator to a cylinder valve
- Recognise the need to open cylinder valves slowly
- Correctly leak test a gas system
- Recognise the need for safe shut-down procedures
- Introduce safe working practices into their workplace

Please note: All delegates must be supplied with, and wear, appropriate PPE during the practical session i.e. eye protection, safety shoes and safety gloves.

Workshop price

Connecting Regulators & Cylinder Set-up Practical (1½ hours)
£765 for up to 8 delegates, additional delegates £95 per head up to a maximum of 12 delegates. VAT is payable at the standard rate.

Please note it is essential that delegates have completed the relevant Safety Awareness Workshop before attending this practical workshop

Additional Information

If you can't identify the hazards you can't assess the risks

First step...choose the relevant safety awareness workshop

All delegates must have completed the appropriate online or Instructor-led safety awareness workshop before they can participate in the practical workshop. In the case of Instructor-led Safety Awareness Workshops the practical is usually held in the afternoon of the same day.

- e-Learning 'Using Compressed Cylinder Gases Safely' or 'Using Oxy-fuel Gases Safely'
- Laboratory Gases Safety Awareness Workshop
- Welding/Shielding Gas Safety Awareness Workshop
- Compressed Gases Safety Awareness for Local Authority Inspectors

Providing total training solutions for gas users...

- All your delegates will receive a certificate of attendance and comprehensive workshop literature for continued reference purposes in the workplace. This includes relevant Standard Operating Procedures if a practical workshop has been attended.

e-Learning

Packages are available for those clients who need a more flexible, accessible method of training which delivers high quality affordable training without the need to gather employees together in a classroom. This method of training is ideal for single users, new starters or as refresher training.

- Gases Safety Awareness is available at www.bocsafetytraining.com
- General Health & Safety is at www.gsc-interactive.com

Special Requirements...

Trained by us before? Please ask about our Refresher Training

- Consultancy Services - Risk Assessments, On-site Advisory Survey, Written Schemes of Examination for piped systems, Piped System Installation, Inspection and Testing
- Equipment solutions for gas users at www.gassafegear.co.uk
