

Does your workplace own and operate a pressure system?
Are you, your colleagues or your business at risk?

ONSTREAM from
BOC is here to help.

Safety, maintenance, parts, legislative compliance, training and efficiency. ONSTREAM from BOC has you covered.

When was the last time your gas system was formally examined?

ONSTREAM from BOC can examine your industrial gas system to check for its safe, reliable and legally compliant operation.

When was your last maintenance carried out?

ONSTREAM from BOC can provide a comprehensive schedule and ongoing maintenance of your pressure systems to keep you safe, reliable and compliant.

Are your Written Schemes of Examination in place and up to date?

ONSTREAM from BOC can give you access to competent persons to assist in the management of these requirements under Pressure Systems Safety Regulations 2000.

How do you ensure parts are available in the event of a breakdown?

ONSTREAM from BOC can give you access to a nationwide fleet of competent technicians who carry, or have access to, common parts.

Are your industrial gases efficiently managed?

ONSTREAM from BOC can carry out checks and provide advice on potential efficiency improvements that could lower your costs.

Are your personnel trained in the safe use of industrial gas systems?

ONSTREAM from BOC can arrange training in the safe use and handling of your pressure systems and the gases they contain.
