Fixed charge for customer collection: £23.95 (ex VAT), £28.74 (inc VAT)

Cylinder information

Cylinders of balloon gas come in different sizes so the number of balloons you can fill depends on the cylinder size chosen.

The above chart should be helpful in determining the size of cylinder required as we show the average number of latex balloons that can be expected from the cylinder (if the balloons are inflated correctly).

9" balloons are based on an average volume of 0.007 m³ per balloon. 11" balloons are based on an average volume of 0.011 m³ per balloon.

You should never inhale balloon gas as it is an asphyxiant and does not support life.

Please note that collection and delivery charges are applied on a transactional basis and not per cylinder. Please note that these prices are list prices for the smaller users only and do not reflect prices for volume trade. For customers requiring larger volumes, discounts may be available. Please contact us (details below) for further information.

Cylinder information

Cylinders of balloon gas come in different sizes so the number of balloons you can fill depends on the cylinder size chosen.

Additional useful cylinder information

Balloon gas is a safe, non-flammable, non-poisonous gas, which is lighter than air. It can be used safely either indoors or outdoors.

The above chart should be helpful in determining the size of cylinder required as we show the average number of latex balloons that can be expected from the cylinder (if the balloons are inflated correctly).

9" balloons are based on an average volume of 0.007 m³ per balloon. 11" balloons are based on an average volume of 0.011 m³ per balloon.

You should never inhale balloon gas as it is an asphyxiant and does not support life.
